

## Quick Start Guide Bluetooth Music Receiver WM-BTMIC06

Compatible with the following models:

- **Renault (all models) with Carminat Radio, except Carminat 5000**
- **Renault (all models) with original radio which have the inscription "Update List"**

### Connect the adapter:

1. For safety reasons and to avoid short circuits, disconnect the vehicle battery during all work on the vehicle electrical system.
2. Remove the radio.
3. Insert the green expander of the WM-BTMIC06 into chamber C2 (outlined in red in the picture).
4. If you have installed a black 20-pin connector in the vehicle, you will also need the adapter WM-4693 (mini-ISO adapter / extension). This can be ordered in our online shop at [www.wm-outlet-store.de](http://www.wm-outlet-store.de).

5. Remove the two 8 pin Iso connectors (in picture A and B) from the radio.
6. Now plug the remote plugs into the appropriate sockets of the WM-BTMIC06 and connect the adapter to the radio.
7. Position the microphone near the driver in the vehicle (steering wheel trim, instrument panel, etc.). The cable is then routed to the Bluetooth adapter and connected to the microphone input. **Avoid placing the microphone in the immediate vicinity of or on airbags.**
8. Establish a Bluetooth connection by activating Bluetooth pairing and searching for the ``WM`` Bluetooth device. You should then set the volume to full volume on the connected device.
9. Before reinstalling the radio, test the function of the adapter. To do this, turn on the radio's AUX function and play music with the connected Bluetooth device.
