

Quick Guide Bluetooth Music Receiver WM-BTMIC27

Compatible with the following models:

- **BMW:** 1er (E81, E82, E87, E88), 3er (E90, E91, E92, E93), 5er (E60, E61), 6er (E63, E64)
- **Only in conjunction with:**
 - SA 609 (navigation system)
 - SA 650 (Radio Business with CD-Drive)
 - SA 661 (Radio Business with CD-Drive)
 - SA 662 (Radio Business)
 - CCC navigation system

Connect the adapter:

1. Remove the radio.
2. Now insert the plug of the Bluetooth adapter WM-BTMIC27 from the back of the Quadlock plug into chamber C until it clicks into place (for Business and Professional radios, take chamber B). This should also work if the Quadlock plug is still on the radio. If the cables are too short or if you can't see the back of the connectors, you can remove the Quadlock connector completely from the radio beforehand.

3. Connect the black ground cable of the WM-BTMIC27 either to the radio housing or to the ground line leading to the radio. Without a good ground connection the function of the adapter is not given.
4. The red cable in your vehicle must be connected to the switched plus (terminal 15, ignition plus).
5. Position the microphone near the driver in the vehicle (steering wheel fairing, dashboard, etc.). The cable is then routed to the Bluetooth adapter and connected to the microphone input.
Avoid placing the microphone in the immediate vicinity of or on airbags.
6. Establish a Bluetooth connection by enabling Bluetooth pairing and searching for the Bluetooth device ``WM``. You should then set the volume on the connected device to full volume.
7. Before reinstalling the radio, test the function of the adapter. Switch on the AUX function with the CD changer button.
